

Evolving Product Family of the Nitto Denko Group

The Nitto Denko Group has lived up to its customers' expectations with advances being made in the areas of solid polymer synthesis technology and adhesive processing technology. The Nitto Denko Group has provided highly functional materials for markets since its inauguration of business as the first domestic manufacturer of electrical insulation material in 1918. Nowadays our range of products is extensive and includes new materials used for cutting-edge electronic devices to products that support the environment and health. The Nitto Denko Group's contribution to society is continually expanding.

Developing into electronics market

Transparent Epoxy Encapsulating Materials for Optical Semiconductor Devices

For cellular telephones

For transfer/fusing parts of photocopiers and laser printers
Intermediate transfer belt
Carrying belt
Fusing belt

Polyimide seamless belts

Optical materials
For LCD television screens

Polarizing films for liquid crystal displays

Membrane products
For producing water in areas lacking a supply of fresh water.

Reverse osmosis membrane products used for seawater desalination.

For headlights of vehicles

Fluoroplastic porous membrane

Removable double-coated adhesive tape

In dismantling parts such as adhesive tapes enhance recycling and reuse efficiency as they remain tough whilst being peeled off and use glue that is easy to remove.

Painting protection film for vehicles

This film protects vehicle coating from acid rain and so on.

Transdermal drug delivery patches

Medical products

Such patches can be used for persons who have difficulty swallowing medication in tablet form.

This product reduces the strain on knees and other joints.

KANTAN taping series (Easy Application Sports Tapes)

Electrical insulating material

High-voltage electrical insulation tape

Electrical insulation varnish

HYPERFLASH® No.695

For around pipes

For sealing cardboard boxes and for other general sealing purposes.

Kraft adhesive tape

Starting from electrical insulating material

Applying and developing adhesive processing technology
