

DURATAACK LST

Thermal transfer linerless label

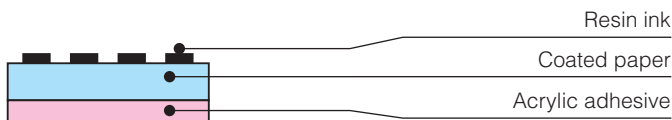

Nitto Denko's expertise in tape bases and adhesives has realized a tape without a liner that can be printed and dispensed.
Has no liner that is disposed as industrial waste.

Features

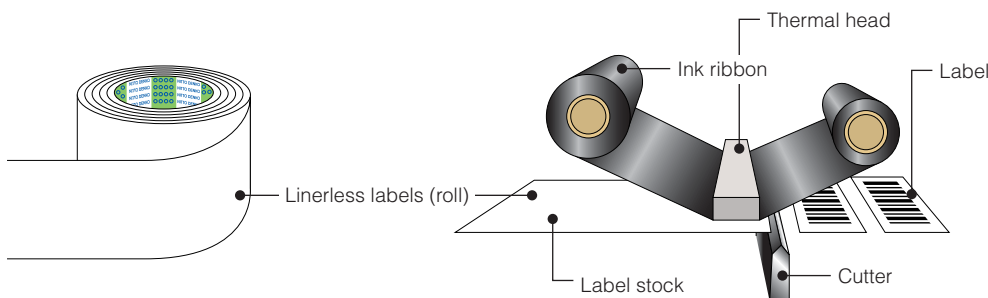

- Thermal transfer label has no liner.
Has no liner that needs to be collected and incinerated.
- The labels come in rolls that are printed and cut by a special printer for labels without a liner.
Label requires no preprocessing.
All you have to do is set the plain linerless label roll in the printer.
- Because no liner is used, the label is smear and weather resistant.
- Labels can be applied over one another.

Structure

Applications

- Nameplate/display labels for electronic and communications equipment and components
- Outer packaging labels
- Inner packaging labels
- Distribution labels

Liability label
