

We aim at harmonizing corporate activities and nature

Corporate Environmental Policy

Nitto Denko established the Corporate Environmental Policy in 1996. Based on this, we plan to achieve environmental management that realizes both resource productivity and corporate growth.

Basic Philosophy

At Nitto Denko Group, we recognize that maintaining the health of the earth for coming generations requires that humanity seriously address the issue of global environmental conservation. Consequently, the Nitto Group, through its adoptions of the corporate vision “creating new value,” is committed to respecting and acting in the best interests of the environment, both locally and globally, in all its operations.

Environmental Policies

1. We will develop an internal environmental management system that promotes effective environmental preservation.
2. With a proper understanding of the environmental impact of our operations, we will develop internal environmental objectives and targets as far as is technically and economically practicable; moreover, we will pursue these objectives and targets in an organized manner to ensure the continual improvement of our environmental preservation efforts.
3. Our technical and product development will focus on the reduction of environmental load.
4. We will continue our efforts to conserve resources and energy, reduce industrial waste, and promote recycling in all aspects of our operations.
5. As part of our dedication to reducing the load on the environment, we will develop alternative technologies intended to reduce consumption of the sources of environmental pollution as well as to control emissions of environmental pollutants to the greatest extent feasible.
6. We will comply fully with environmental laws, regulations and agreements, and will impose our own environmental criteria as required in the interests of environmental preservation.
7. We will make sure that our employees receive environmental training and information so that all understand the significance of our Corporate Environmental Policy, have increased awareness of the importance of environmental preservation, and act on our Corporate Environmental Policy.
8. We will conduct periodic environmental audits in order to monitor the effectiveness of our environmental management strategy and identify areas requiring improvement.
9. As part of our social contribution, we will publicize proprietary technologies and information that are likely to benefit the environment.
