- Reduced chemical discharge
- Reduced waste

Introduction and establishment of environmental management systems ... pg. 17 to 22

- Promoting the acquisition of ISO14001
- Support for chemical management
- Environmental accounting
- Promotion of voluntary plans

Using technology for synthesizing, processing and applying polymers, the Nitto Denko Group produces and supplies materials and parts used in IT and office equipment, automobiles and home appliances, and housing. The major effect of our production activities on the environment comes from:

[1] Our extensive use of oil as a production resources, and;

[2] Our extensive use of organic solvents in the production of several products.

The Nitto Denko Group undertakes a variety of issues to reduce our environmental load, in line with our corporate environmental policy*.

* For more information on our corporate environmental policy, see pg.17.
