

Innovation for Customers

2025 Corporate Profile

Nitto Denko Corporation

Contribute to customers' value creation with innovative ideas

In 1918, during the First World War when it was difficult to procure materials from abroad, Nitto Denko Corporation (referred to as Nitto hereafter) was founded as Nitto Electric Industry Co., Ltd. in Osaki, Tokyo to produce domestically insulating materials needed for electronics.

Since it was founded, Nitto faced many crises. However, Nitto has overcome these crises and refined its foundation to become what it is today by pouring everything it had into each and every product, and by pursuing customer service. By continuing to work together with customers, we are now developing our business globally to offer various products in three focus domains "Power and Mobility", "Digital Interface" and "Human Life", based on our core technologies that we have developed over years.

In today's world, as we move forward into a new age, social issues have become even more diverse and complex, and society is changing at a pace that is faster than ever. Against this backdrop, the Nitto Group will place ESG at the core of its management and implement the "Niche Top Strategy and Nitto-style ESG Strategy," which aims to create products and services that contribute to the environment and humanity by leveraging the strengths of its technology, balancing providing solutions for social issues and creating economic value. By contributing to people's healthy lives and a sustainable global environment more than ever before, we want to continue to be an essential top ESG company for the world.

The Nitto Group will continually challenge to inspire the world and create values that the society recognizes, taking the changes of the society as an opportunity with our corporate philosophy of "Contribute to customers' value creation with innovative ideas".

Hideo Takasaki
President, CEO and COO
Nitto Denko Corporation

Everywhere, Comfortable Life

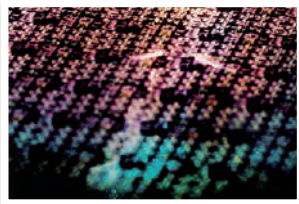

Housing / Housing Equipment

The housing industry is faced with increasingly demanding functions, such as solar cells, storage batteries, and an integrated management system for household appliances. Nitto is doing its best to meet these advanced requirements by providing the materials and parts needed for these applications.

Packaging

Nitto provides a wide range of tape products that are used in various applications. Some of the products include tape for cardboard packaging, temporary adhesion tape that doesn't leave any adhesive residue when removed, and security tape that makes it possible to know that the tape was tampered with.

Electronic Devices

Nitto provides a wide range of products for manufacturing processes and parts, including semiconductor and electronic component manufacturing process materials, optical device sealing materials, and HDD peripheral materials.

Infrastructure Industries

Nitto offers products and technical services, including filtration membrane that help protect water resources through seawater desalination and reuse of drainage water. In addition, Nitto has advanced development in the field of new energy, providing materials for wind power generation.

Medical

Nitto has secured the global top share in the synthesis of nucleic acid medicines. Nitto's transdermal adsorption drugs that apply its adhesive technology have been highly acclaimed for their reliable production technology based on long-standing experience.

Automotive and Transportation Equipment

Nitto provides new value to meet the recent needs of the automobile field, through technologies such as lightweight, and the evolution of power modules for environmental vehicles and electrical equipment developed in pursuit of safety and amenity.

Consumer Products / Personal Care Products

Nitto supplies the consumer market with various materials from housewares to materials used in hygienic goods, such as diapers. These products help customers achieve a more comfortable way of life.

Home Appliance and Electrical Equipment

Nitto offers a diverse lineup of products for various applications. This wide variation includes ultra-thin sealant materials, which are practically free of impure substances that can contaminate devices; as well as double-sided tapes which can replace mechanical fasteners such as screws.

Materials

Beginning with surface protection films, Nitto provides a diverse lineup of products for processing materials such as metal plates, resin substrates, glass sheets, and more.

Displays

Nitto offers valuable solutions that incorporate its unique technologies and products. Nitto has experience in producing high-definition image, durable, thin, and lightweight technologies in various types of optical and adhesive film for displays and touch panel devices.

Nitto Group's Strengths

Staying close to our customer is a key element of Nitto Group's corporate culture. Our strength is in our corporate culture, and it is how we expand our business activities.

Sanshin Activities

The Nitto Group's unique marketing approach stimulating new demand through the development of new applications and new products

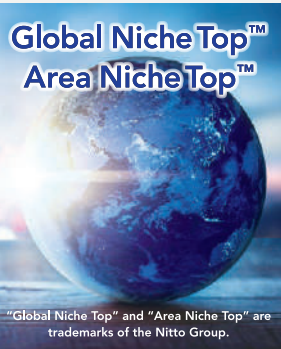

Finding "new" applications for existing products and then adding new technologies to them or using new technologies to develop "new" products and then expanding their applications, thereby creating "new" demand - Literally translated as "three new activities," *Sanshin* activities are the Nitto Group's proprietary marketing approach which we have diligently followed for more than 50 years by repeating the cycle of the three "news" for continued progress.

Niche Top Strategy

Shooting for the leading share by leveraging proprietary technologies in niche markets where we have a competitive advantage

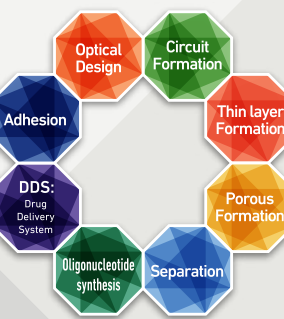

The Niche Top strategy is the Nitto Group's unique focus/differentiation strategy, under which we pour our management resources into niche market spaces where we can tap into our proprietary technologies and maximize our competitive advantage in the ever-growing(-changing) market. The Global Niche Top™ strategy directs our drive for a leading share in the global market, whereas the Area Niche Top™ strategy guides us to the leading position in national and regional markets as we offer products that meet the specific needs of each area.

Core Technologies

Developing products that meet customer needs by combining the eight core technologies

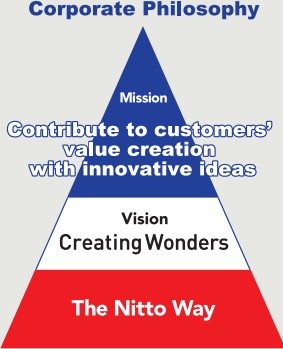

The Nitto Group has made constant efforts to combine and advance its founding technologies to develop core technologies, which are being applied to a broad range of businesses. In the domains of Power & Mobility, Digital Interface, and Human Life, where our technologies and strengths are felt most acutely, and spaces where they intersect, we hybridize our core technologies to develop "essential" products.

Corporate Culture

"The Nitto Way" - A set of values for Nitto people to embrace and practice

"The Nitto Way" is a set of values which every Nitto employee should embrace and practice to achieve the company's future vision. All Nitto Group employees should understand "The Nitto Way" and work vigorously, with attention to physical safety and mental well-being, to realize our "Mission" and "Vision".

Research & Development

Both Business Divisions and Corporate Divisions work together on research and development. The Corporate R&D consists of 2 divisions: the **Corporate Research and Development Division**, **New Business Development Division**. In addition, the **Technology and IP Strategy Division** is collaborating closely to create future businesses and technologies.

An integrated facility for R&D and Human Resource Development "inovas"

Established in 2016, inovas serves as a center for R&D and human resource development, as well as an innovation center which explores opportunities for co-creation with customers. The name of the facility combines the words "innovation" with "nova" (Latin for "new star"), which is named under the hope of creating countless "new stars" (core businesses) through innovation.

Global R&D system

The Nitto Group has established R&D centers across the world to promote locally-initiated R&D based on regional traits. By integrating a wide range of knowledge and techniques, and generating new value chains, the group strives for further development of our unique technologies and making steady progress for the seeds of business.

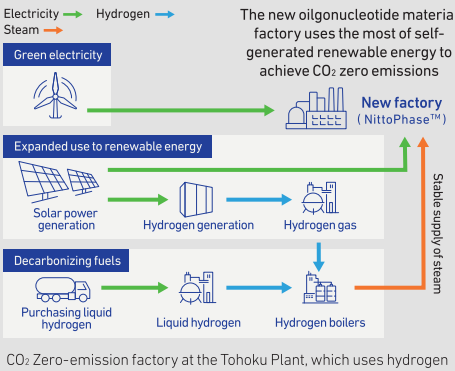

TOPICS

Nitto Group's First CO₂ Zero-emission Factory to be Completed

The Nitto Group's first CO₂ zero-emission factory, which makes use of in-house renewable energy at the Tohoku Plant (Osaki City, Miyagi Prefecture), was completed in fiscal 2024. The Nitto Group aims to achieve net zero CO₂ emissions through the production and storage of green hydrogen using surplus solar electricity and the construction of Japan's first system that produces hydrogen gas from liquefied hydrogen to generate steam in 100% hydrogen fueled boilers. After 2025, more boilers will be installed so that they can supply steam for the entire Tohoku Plant, thereby decarbonizing the plant. Nitto will accelerate its efforts to reduce CO₂ emissions throughout the value chain by establishing hydrogen operation and energy storage technologies in preparation for the future implementation of green hydrogen in society.

Nitto Group's Management Strategies

With the strong determination to place ESG at the core of its management, the Nitto Group has clearly stated in its Basic Policy on Sustainability that it will “simultaneously solve social issues and create economic value” through business activities. To this end, we aim to be an “essential top ESG company that continually brings amazement and inspiration as a Niche Top creator” by 2030. Thus, we are now working to achieve our financial and future financial targets through the implementation of our mid-term management plan, Nitto for Everyone 2025 to realize our vision.

Nitto Group’s Mission

Corporate Philosophy (Mission)

Contribute to customers’ value creation with innovative ideas

Basic Approach to ESG Management

Basic Policy on Sustainability

Simultaneously solving social issues and creating economic value

~ The Nitto Group keeps challenging itself to realize a sustainable future and support well-being for everyone by serving the global environment, humankind, and society as our customers.~

Nitto Group’s Long-Term Targets

The 2030 Ideal State

An “essential top ESG company” that continually brings amazement and inspiration as a Niche Top creator

Three-year action plan

Mid-Term Management Plan “Nitto for Everyone 2025”

Implementing Our Niche Top Strategy and ESG Strategy

(Financial and future-financial targets are set as management targets)

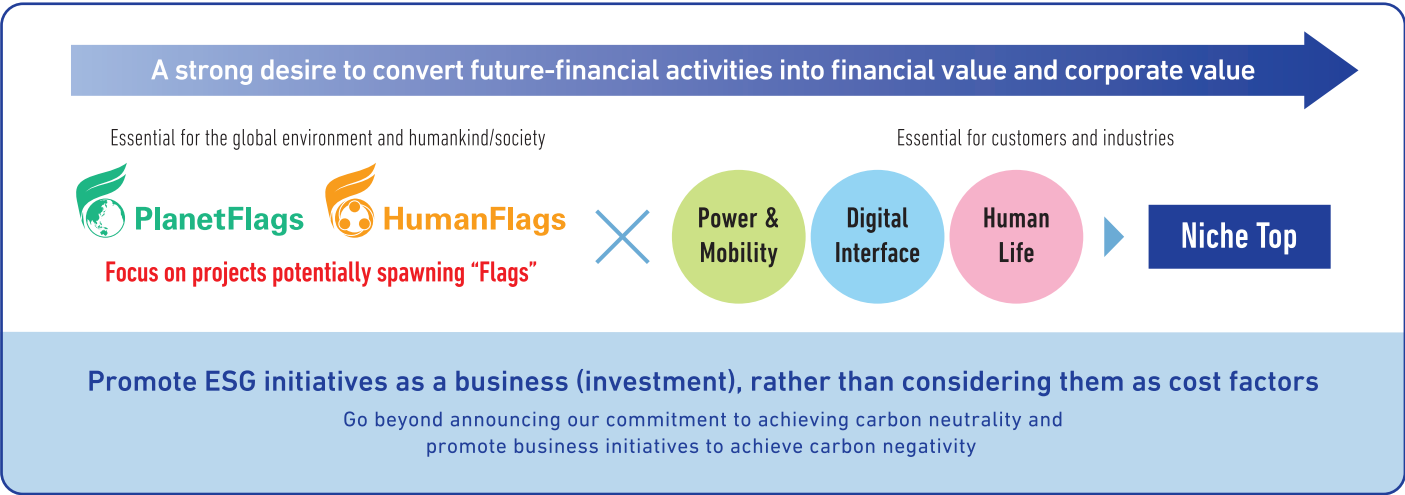

Nitto's ESG Management

By “ESG management,” we mean to solve social issues through the development and delivery of PlanetFlags/HumanFlags and create economic value by evolving them into Niche Top solutions. This will be accomplished by way of agile Nitto Persons who dare to challenge themselves, eco-friendly manufacturing, and a sound and resilient business foundation that underpins them. Through our unique approaches, we aim to become an “essential” entity that continues to amaze and inspire customers.

Turning Future-Financial Activities into Financial Value

The Nitto Group treats ESG initiatives as a business investment, not a cost. With this in mind, we are working to convert “future-financial” activities into “financial” value and then into corporate value.
