Brief Description of Main Products

Main Products of Our Seven Plants

**Tohoku Plant**
- Medical Related Products Div.
- Double Coated Products Div.
- Transdermal therapeutic patch
- Medical supplies
- Tissue cultured greening
- Surgical tape
- Precut
- Water-suitable double-coated adhesive tape

**Kameyama Plant**
- Semiconductor Related Products Div.
- Printed Circuits Div.
- Flexible printed circuits
- Printed circuit boards for HDI magnets resistive heads
- Transparent encapsulating resin for optical devices

**Kanto Plant**
- Engineering Plastics Div.
- Electronic Component Products Div.
- Fluorocarbon resin products
- Porous film materials, polyimide films
- Heat resistant tape for electronic components

**Onomichi Plant**
- Optical Related Products Sector
- Optical for liquid crystal displays (polarizing films, retardation films, polarization converting system)

**Kyushu Plant**
- Semiconductor Related Products Div.
- Transparent encapsulating resin for semiconductor manufacturing process
- Flexible printed circuits

**Toyohashi Plant**
- Tape Products Div.
- Double Coated Products Div.
- Tape Applied Products Div.
- Optical Related Products Sector
- Solar Cells
- Transparent encapsulating resin for optical devices
- Cleaning material for semiconductor manufacturing process

**Shiga Plant**
- Membrane Div.
- High-polymer separation membranes

**List of Products by Division**

Since being founded in 1918 for domestic production of electric insulation material, Nitto Denko has supplied all sorts of products to meet the needs of society through a combination of advanced technologies centered around high-polymer chemical technology. The company currently has seven domestic plants that produce products that could earn it the top global niche, beginning with the twelve top share products in the world.
